DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 12, 14-16, and 18 are rejected under 35 U.S.C. 101 because:

1) Superluminal observations are only apparent, and they can be simply explained employing an explicitly (sub)luminal causal theory (see Vera L. Brudny "On the apparent superluminality of evanescent waves"). Therefore, the claimed invention "Superluminal" (detection and device), is only a theory (disagreement with the scientific community); therefore, it's not an asserted utility.

2) Detecting the Doppler redshift direction verse the Earth's motion is not possible because the device is located on Earth and Earth is the frame of reference, it is not possible to detect the redshift (different reference frame) as claimed.

3) It is not possible to determine the date and time from the claimed system, nor there is any clear support for it in the disclosure.
